Re: PCB Annual Report for CY '91

Attached is a copy of Sistersville Plant PCB Annual Report for the 1991 calendar year.

This report is kept on file in the Location Environmental Inventory at the EP Department (Bldg. 321).

Replacement of all PCB electrical equipment at Sistersville was completed July 1, 1991 and any remaining PCB items shipped offsite for disposal on July 26, 1991.

There is no known PCB item (capacitor, transformer or heat transfer fluid) in service at the plant.

If there are any questions concerning the above, please contact me at ext. 350 or UNICOM (8-731-1350).

  
J. A. Selnekovic
